Publication

M. J. Luckow and T. Fluschnik. “On the Computational Complexity of Length- and Neighborhood-Constrained Path Problems”. In: *Information Processing Letters*. Vol. 156 (2020). doi:10.1016/j.ipl.2019.105913 1/2020

Work Experience

Technical Accountant

Project analysis, optimization, automation and supervision of the accounting system
Datev Uno \ Haskell 9/2020 – present

Agilo-Services GmbH

Web Developer

Development of the core backend and enterprise administrative software solution
Javascript \ Node.js \ Vue.js \ SQL 3/2018 – 4/2018

Trado GmbH

Technical Specialist

Strategy planning, development of the first mining prototype and supervision of the production of the first large scale mining operation with \$100 million market value
Linux \ Solidity 6/2017 – 11/2017

Envion AG

Self-employed

IT administration, development and project support 1/2014 – present

Education

Master of Science. Computer Science

Specialisation in cognitive systems
Java \ Python \ Solidity 4/2017 – 3/2023

Technical University of Berlin

Bachelor of Science. Computer Science

Area of study in foundations of computing with a thesis on algorithms and complexity
Java \ C/C++ \ Python \ SQL \ Latex 10/2013 – 3/2017

Technical University of Berlin

Energy and Process Engineering

Fortran \ Latex 4/2011 – 9/2013

Technical University of Berlin

Interests

Language

German: Native speaker
English: Proficient
Latin: Latinum

Technical Expertise

Max
